OBJECTIVE

Seeking a challenging opportunity as a Software Engineer to leverage my technical skills and contribute to innovative projects while further enhancing my expertise in software development. Skilled in front-end and back-end technologies, committed to deliver user-friendly, scalable, and efficient digital solutions.

EDUCATION

Bachelor of Engineering in Computer Science, Chandigarh University 2020-2024
CGPA: 7.61

Intermediate (CBSE), Noble Public School 2019-2020
Percentage: 94.5

Matriculation (CBSE), Noble Public School 2017-2018
Percentage: 93.5

SKILLS

Languages	C++, Java, Javascript,
Front-End Development	HTML,CSS
Databases	MongoDB, MySQL
Frameworks	ReactJS, Express, Tailwind
Miscellaneous	NodeJS, SQL, OOP, Git, SDLC Methodologies
Core Subjects	DBMS, Computer Networks, OS
Soft Skills	Problem Solving, Fluent Interpersonal and Communication skills , Good analytical skills

PROJECTS

Chat Application : Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React, Node.js), Chakra UI, and Socket.IO. Implemented user authentication, responsive design, and dynamic chat features including one-on-one messaging, group chats. Utilized Socket.IO for efficient bi-directional communication and MongoDB for secure message storage. ([Try it here](#))

Portfolio Website : Developed a responsive and interactive portfolio website using HTML, CSS, JavaScript, and React. The site showcases personal projects, professional experience, and skills with an intuitive and user-friendly interface animation. Key features include a dynamic project gallery, a contact form with validation, and smooth animations.

Food Ordering Application : Developed a food ordering app using Android Studio and Java, enabling users to browse menus, customize orders from restaurants.Implemented features like user authentication, real-time menu updates, cart management.Ensured a responsive, user-friendly interface to enhance the customer experience.

ACHIEVEMENTS/CERTIFICATIONS

- Certification in Software Testing (Elite Silver) - NPTEL Successfully completed a 12-week comprehensive course on Software Testing, covering core concepts such as testing methodologies, test case design, defect lifecycle, and automation tools. Achieved a consolidated score of 75
- Competitive Coding (350+ Questions) Strong problem-solving skills by solving over 350 algorithmic and data structure challenges on Leetcode,CodeChef and GFG.
